

The Oppenheimer Panhandle System

GRNMF

GRCMF

Articulating Panarms

Four of Our Grips

Since 1993, Oppenheimer Camera Products has been producing the Oppenheimer Panhandle System. The first Oppenheimer Panhandle was developed to solve the problem of how to successfully mount a Preston Microforce onto the panhandle of a fluid head. Since we began this project, Oppenheimer Camera Products has introduced many other innovative products for film and video production including specialty lenses, the Spin Axis, on board battery systems, and monitor yoke mounts.

From the first, simple Oppenheimer Panhandle, the system has grown to work with many different zoom grips on a wide variety of fluid heads from Sachtler, O'Connor, Cartoni, Ronford, Vinten and Weaver Steadman. We accommodate both the original Microforce and the newer versions. We have built grips for Arriflex zoom controls and for the C-Motion zoom control. We also

have systems of camera handgrips which can work with or without our zoom grips.

The system allows the user to select one of several grips, to work with any of a large number of articulating panarms or gripsets. The systems are equally at home with professional film or HD cameras.

Oppenheimer Camera Products continues to keep this product current as cameras and zoom controls advance. We carry spare parts so that our clients can repair their systems. We always look forward to client suggestions for new products!

Some Examples of Panhandle Products

| | |
|--------|---------------------------|
| GRCMF | Classic Microforce Grip |
| GRNMF | New Microforce Grip |
| PHART | 18mm Articulating Panarm |
| PHHDCA | 25mm Cartoni HD Panarm |
| PHHDCA | 1" O'Connor HD Panarm |
| PHHDCA | 28.5mm Sachtler HD Panarm |
