## **ARRI ALEXA / AMIRA OB Mains Power Supply**

### **Alexa / Amira "A"**

Alexa / Amira Power Supply provides 250 Watts of On Board power. The power supply mates to your choice of Gold Mount or V Mount Battery Plate, mechanically, but not electrically. Power is provided through our standard 4-pin XLR outlet, which then mates to the camera's 2-pin Fischer power inlet (Alexa) or 8-pin Lemo power inlet (Amira).

Unit includes an AC power cable appropriate to your country's standard as well as the power supply-to-camera body (2-pin Fischer or 8-pin Lemo) camera cable.

All Alexa / Amira Power Supplies include our "sidecar" with (3) 3-pin Fischer 28V outlets in the same standard as the camera body, as well as (1) 2-pin Lemo 14.4V outlet in the same standard as the camera body.

The power supply is completely isolated electrically. The AC inlet is fuse protected and all outlets are "self healing" fuse protected.

<b>Pricing</b>	<b>1-2 Units</b>	<b>1995.</b>
	<b>3-4 Units</b>	<b>1895.</b>
	<b>5-7 Units</b>	<b>1795.</b>
	<b>8+ Units</b>	<b>1695.</b>

### **Alexa / Amira "B"**

Identical specifications to the Alexa / Amira "A" unit, but with the addition of a redundant battery plate (Gold or V Mount) on the back of the unit passing 14.4V passively through the unit to the camera battery plate.

The camera will elect to operate from the higher voltage provided (14.4 or 28), so when there is AC present and connected, the camera will operate from the 28V source. In the event that AC power is interrupted, the camera will revert to the attached 14.4V battery and continue to operate.

<b>Pricing</b>	<b>1-2 Units</b>	<b>2395.</b>
	<b>3-4 Units</b>	<b>2275.</b>
	<b>5-7 Units</b>	<b>2195.</b>
	<b>8+ Units</b>	<b>2035.</b>
